

The Art of Drawing in Perspective, from Mathematical Principles

Filesize: 6.51 MB

Reviews

This publication is fantastic. We have read through and I am certain that I will be planning to read yet again yet again down the road. You won't feel monotony at any time of your respective time (that's what catalogs are for concerning when you request me).

General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1805. Excerpt: . . . PROPOSITION I. PROBLEM. 20 describe an equilateral triangle, upon a given right line. Let AB be the given right line, upon which it is required to describe an equilateral triangle. About the centre A, with the distance AB, describe the circle BCD a; and about the centre B, with the distance BA, describe, Postuiatc the circle ACE from the point C, where the two circles inter-3. sect each other, draw the lines CA, CB b. b post. x Then, because A is the centre of the circle DBC; AC is equal to AB c; and because B is the centre of the circle ACE; c Definition BC is equal to BA c; but CA is proved equal to AB; and BC 15. to AB; therefore BC is equal to AC d; and the three sides AB, d Axiom 1. BC, CA, are equal to one another: therefore, upon the given right line AB, there is described an equilateral triangle ABC: which was required. PROP. II. PROB. From a given point to draw a right line equal to a given right line. Let A be the given point, and BC the given right line, it is required from the point A, to draw a right line, equal to the given right line BC. With the centre C, and distance BC, describe the circle BGH a; a Post join AC b, upon which describe an equilateral triangle DAG c; b Post. i. produce DC passing through the centre,...
